

Master's Programme of Studies
Translational Research in Molecular Biology & Genetics

Basic Modules

- Translational Genomics
- Proteomics in Health
- Bioinformatics
- Bioimaging Methods
- Biomarker Discovery
- Molecular Diagnostics
- Drug Development
- Individualised and Targeted Therapies

Complementary skills

- Biosafety-Laboratory Practice
- Academic and Research Skills
- Bioethics-Clinical Trials Regulations
- Entrepreneurship

The language of instruction is English

Deadline for applications: June 20, 2014

Starting date: October 2014

Information:

Department of Molecular Biology & Genetics,
